Same never made a difference

Sustainability embodies resilience through adaptation and innovation - Übergreen is built on that

We are a consultancy that focuses on what is essential for you:

To deliver tailored solutions for your specific challenge, we pool the best talent from all over the world to get your job done. Our organisational structure is up to the time - agile, cost and resource efficient - as we specialise in working virtually and on-the-ground but always directly with you.

We use the latest technology and tools to collaborate with our clients to ensure a smooth process along the way. Our "Why" is to make your projects and communities bloom sustainably while keeping our solutions clean and green. That is why we are Übergreen.

Our Mission

Bridging Existing Gaps

in Latin America and the Caribbean, exacerbated by digital divide and limited access to worldwide logistics routes, knowledge hubs and innovation clusters, by harnessing and directing the impact potential of climate change adaptation, renewable energy, energy efficiency, circular economies and wider interpretations of sustainability through our expertise and innovative solutions in one of the world's most vulnerable and affected regions to climate change and economic underdevelopment.

We worked with

We work towards mainstreaming sustainable value creation in all aspects of business and communities

We achieve that by applying bespoke screening tools to identify opportunities, develop context specific strategies and execute and monitor tailored solutions.

Area of Expertise

Climate Finance and Climate Risk Assessment

Client: World Bank Group

Climate Finance Strategy Development for a National Development Bank in Latin America. Climate change risk assessment and a road map for mainstreaming climate change adaptation and access to international climate funds.

Cluster Development Planning

Client: Inter-American Development Bank

Blue Economy cluster and financing plan development for blue infrastructure in the Southern Caribbean with a focus on climate resilience and support of vulnerable communities.

Renewable Energy Policy Development

Client: Government of Trinidad and Tobago

Implementation of a National Renewable Energy Policy Framework for Trinidad and Tobago including work on TT's GHG Inventory and iNDC.

Area of Expertise

Innovative Business Planning

Client: *Inter-American Development Bank*

Turning an environmental problem into an export opportunity. Innovative, organic and climate-smart product and service development in a Small-Island Development State (SIDS).

Communications Management

Client: *Government of Trinidad and Tobago*

Development of Marketing Kits for the Tobago Good Food Project executed by the European Business Chamber Trinidad and Tobago and financed by the Ministry of Trade and Industry and the Ministry of Labour and Small and Micro Enterprise Development.

Nationally Determined Contributions (NDC) Transition Pathways

Client: *Caricom*

GHG Inventories, recommendations for adaptation / mitigation pathways for Private and Government Sector locally and regionally. Including baseline assessments, monitoring of iNDC-NDC transition pathways for regional entities.
